GLUDAN

Turn your chemistry into something that sticks!

Are you an advanced university student in Chemistry, Polymer Science, Materials Science, Sustainability or a related field – and looking for an opportunity to apply your knowledge to real industrial challenges?

Gludan is offering 3–6 month R&D internships at our facilities in Büchen, Germany.

Depending on your interests and academic background, you could work with:

- Formulation development
- Sustainable adhesives
- Raw material substitution
- Bonding & material testing
- Analytical methods
- Method development & standardization
- Upscaling from lab to production

The internship gives you hands-on experience in an industrial R&D environment, with access to both laboratory and production facilities.

There may also be an opportunity to develop your Bachelor's/Master's/PhD thesis in collaboration with Gludan.

And if it turns out to be a great match? The internship could potentially become the beginning of a longer journey with Gludan.

Information:

On-site in Büchen, Germany
Duration: 3–6 months
